

### [FiveThirtyEight Club Football Data](#)

Please visualize answers or insights to the following questions about the Football Data in a report or dashboard using the tool(s) of your choice:

- Who are the best and worst performing teams in each league?
- How much better are the best performers than the worst performers in each league?
- How competitive is each league?
- How would the worst performers in the best league perform in the worst performing league? How would the best performers in the worst league perform in the best performing league?

This exercise should take you no more than 2 hours to complete. These questions have intentional ambiguity in the style of true requests from business stakeholders; this is an exercise both in your technical data manipulation and visualization skills and also your ability to communicate a data narrative on complex business problems.
